ARAFAT RAHMAN

Full-Stack Software Engineer

Rajshahi, Bangladesh | +880 1771-259478 | arafatsohan2003@gmail.com | linkedin.com/in/ars2k05 | github.com/ars2k03

SUMMARY

Full-stack software engineer who designs, builds and ships production web platforms end to end with TypeScript, Next.js, NestJS and PostgreSQL. Founding engineer at two early-stage startups, an AI hiring platform and a quick-commerce platform, and creator of a public WhatsApp OTP API that both run on in production. Open to full-time software engineering roles.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, SQL, Dart
Backend:	NestJS, Node.js, Express.js, REST APIs, WebSockets (Socket.IO)
Frontend & Mobile:	Next.js, React, Tailwind CSS, Flutter
Databases:	PostgreSQL, MongoDB, Redis, Prisma ORM
Cloud & DevOps:	Supabase, Cloudflare, Docker, GitHub Actions (CI/CD), Linux, Git
AI:	LLM integration (Gemini, Ollama), AI agents, speech-to-text, text-to-speech

EXPERIENCE

Founding Full-Stack Engineer, Chakri.ai (Remote) **Jun 2026 – Present**

AI-powered hiring platform for the Bangladesh job market, in public beta · chakriai.com

- Architected and built the entire platform as the sole engineer, covering frontend, backend and database, and took it from concept to public beta
- Built AI voice interviews with speech-to-text and text-to-speech, plus AI agents that shortlist candidates for recruiters and auto-apply to jobs for job seekers
- Designed a modular NestJS and PostgreSQL backend with 48 data models, covering CV parsing (PDF/DOCX), AI job matching, applications and real-time messaging over Socket.IO and Redis
- Integrated Gemini and Ollama Cloud LLMs to keep AI inference costs low during beta

Founding Full-Stack Engineer, JoldiMart (Remote) **Sep 2026 – Present**

Quick-commerce startup delivering groceries in Dhaka within 10 minutes · joldimart.com

- Built the customer storefront, NestJS backend and PostgreSQL database as the sole engineer
- Implemented phone login with WhatsApp OTP, product catalog, cart, saved addresses, checkout and live order tracking
- Launched Cash on Delivery checkout; integrating bKash and Nagad mobile payments

Full-Stack Software Engineer, LuminexLabs (Part-time, Remote) **2026 – Present**

Independent software studio building web, AI and SaaS products for clients · luminexlabs.io

- Build web, AI and SaaS products for client businesses, working across backend, frontend and deployment

PROJECTS

WA Gateway, WhatsApp OTP API **wa.ars2k03.online**

- Built and operate a free public API that lets any website send OTP codes over WhatsApp; it powers login for Chakri.ai and JoldiMart
- QR-code number pairing, API keys, per-key quotas (100/day, 3,000/month), custom message templates and rate limiting, built with NestJS, PostgreSQL and Redis
- Persisted WhatsApp sessions in Redis with automatic reconnection after network drops and server restarts

ars-facebook-auth, Open-Source npm Package **npmjs.com/package/ars-facebook-auth**

- TypeScript package that verifies Facebook access tokens and returns a typed user profile in two lines of code, with zero runtime dependencies

EDUCATION

B.Sc. in Computer Science and Engineering **2024 – 2028 (Expected)**

Rajshahi University of Engineering & Technology (RUET), Rajshahi, Bangladesh
